DEX

One exchange. All of crypto. Decentralized.

Utilising the interoperability of the Wanchain back end the curve DEX will allow you to not only store but now exchange ALL of your tokens through one location, in real time with a user friendly interface. Options between basic buy/sell [at market rate] interface or, of course all the features required for a pro trader.

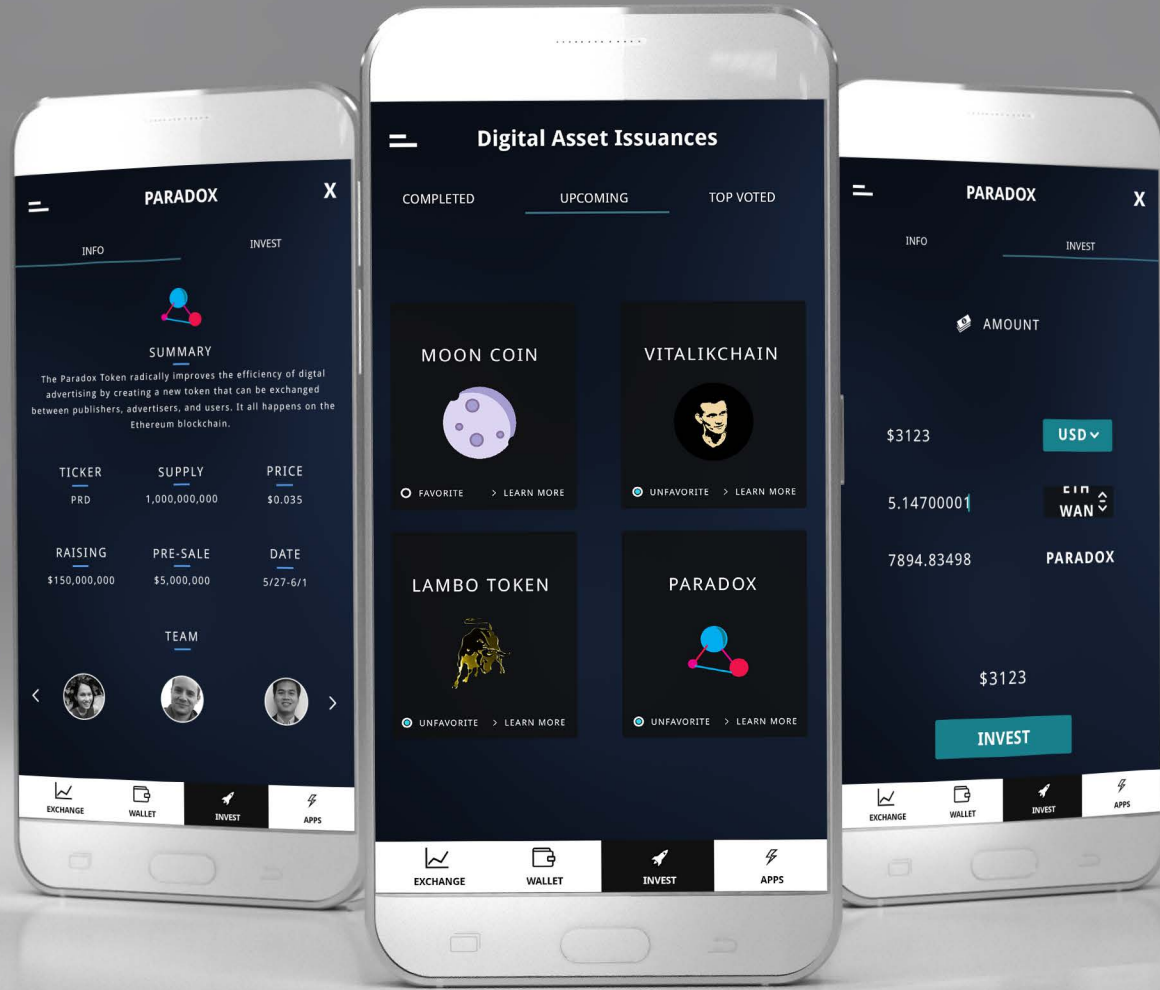

NUKE

Bitcoin breaking out? Act now. Nuke it!

Instantly “Nuke” your portfolio, liquidating all, or a select percentage of your portfolio into Eth, BTC, or a stable coin at the click of a button. Take a snapshot of your current holdings so you can convert proportionally back anytime.

ICO INVESTING

Easily and safely participate in ICOs through the curve platform
Invest in securities-compliant ICOs with any cryptocurrency with a single KYC check.

ICO STAKING

Stake your CURV. Unlimited potential.
No work.

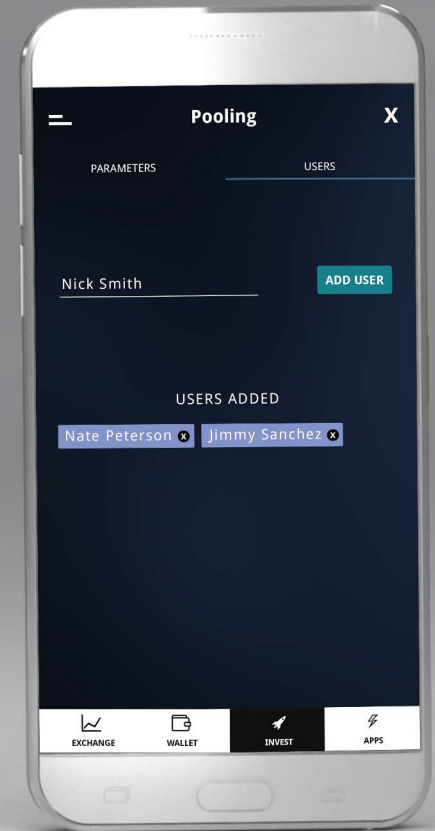

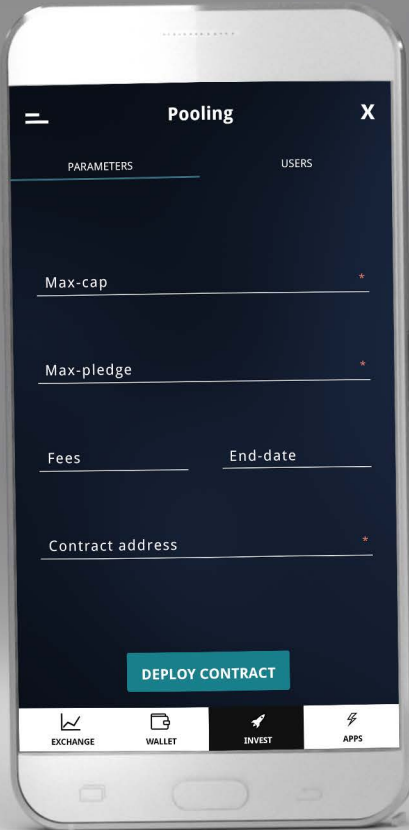

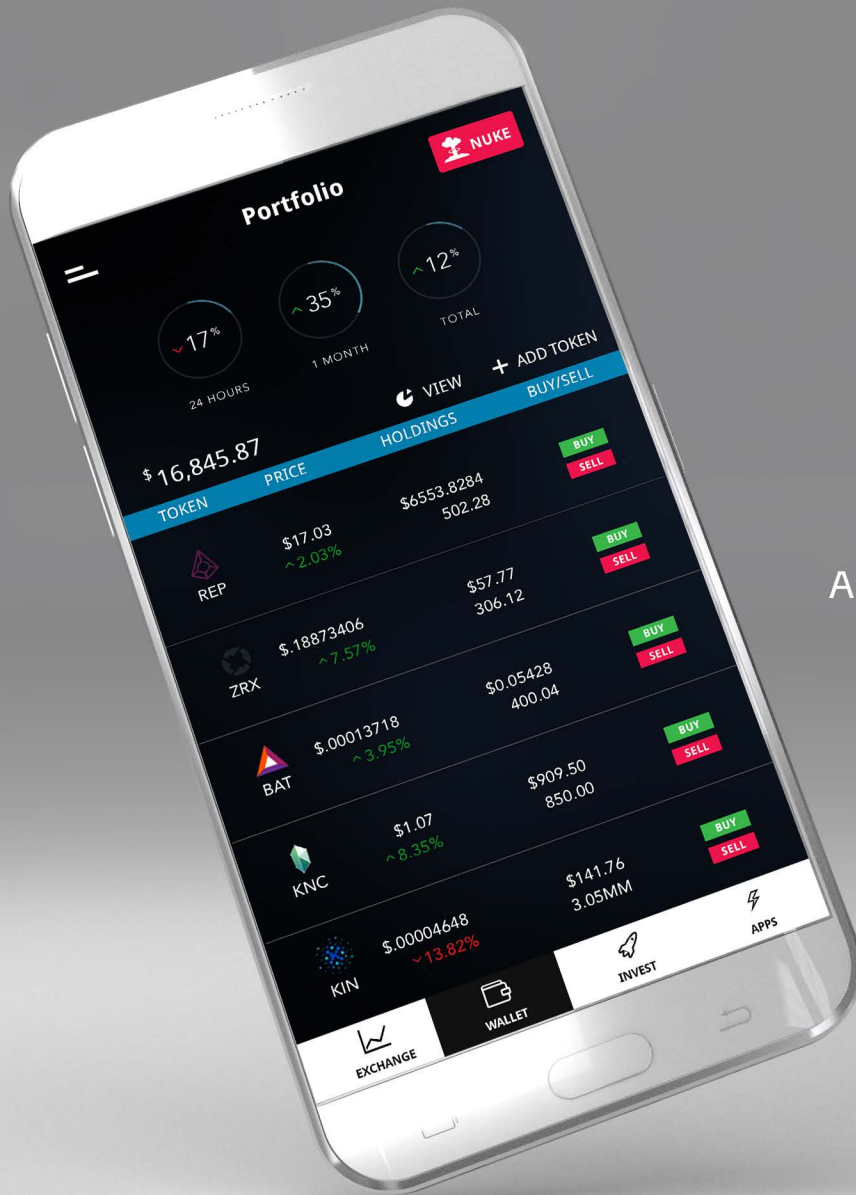

A single investment into CURVE, staked in our smart contract equals investments in every ICO hosted through the Curve platform. The more Curve tokens you stake, the more airdrop tokens you receive.

ICO POOLING

Smart Pools. Trustless Process. Early access.

User friendly, organised front end, keep all your records in one simple place. Never lose track of what pools you're running, your fee structure and of course all the details of every pool you've ever participated in. The Curve platform is a seamless combination of all the pooling features you've always needed.

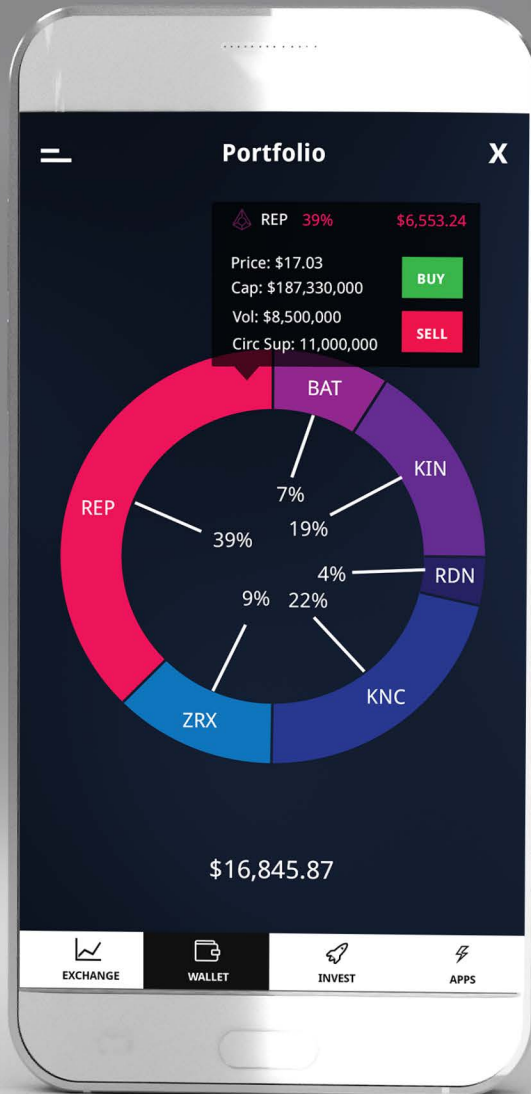

PORTFOLIO TRACKING

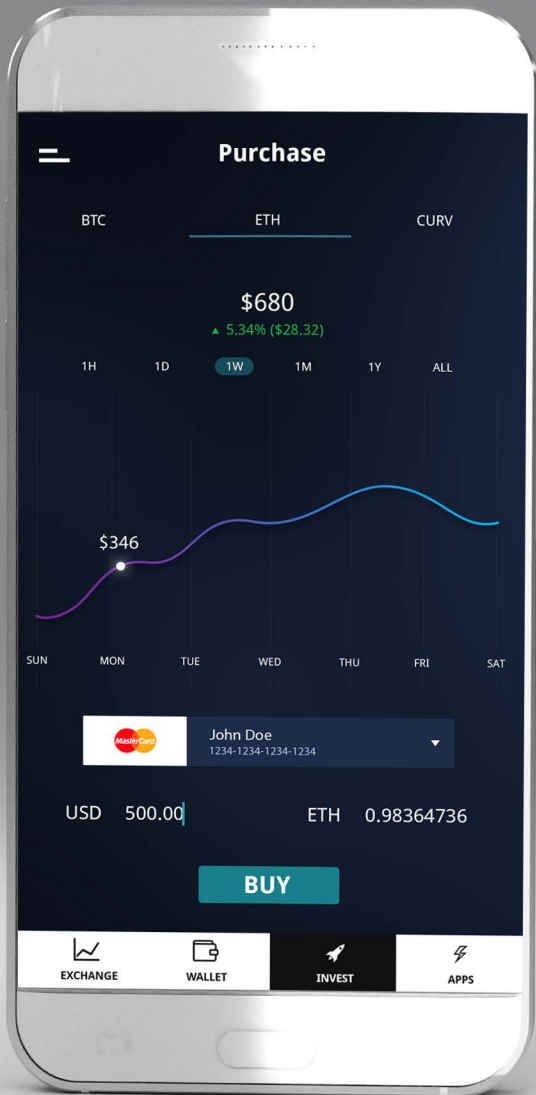

Automatically track your entire investment history.

Easily monitor the performance of your trades, ICO investments, and more. Optionally receive end-of-year transaction and performance history. Simplify your tax reporting obligations.

INTERACTIVE PORTFOLIO CHART

View your entire portfolio in pie chart format and touch to reveal data and initiate buys or sells.

FIAT GATEWAY

Buy in. Cash out. Any coin.

Buy and Sell fiat without needing to manually exchange for BTC or ETH.

CURV TOKEN FUNCTION

VOTING

POOLING

DISCOUNTS

BURNING

STAKING

All CURV holders have voting rights for which ICOs Curve should pursue to have listed on our platform.

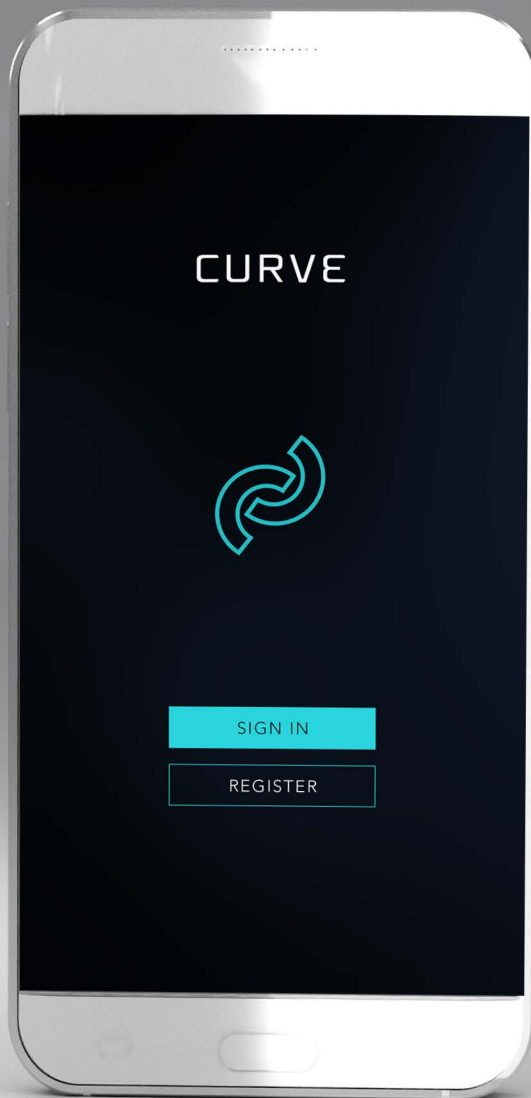

Create and run your own pooling smart contract when you hold enough CURV tokens.

Earn discounts on Curve supported ICOs and trading fees when you pay with CURV tokens.

CryptoCurve buys back a percentage of tokens every quarter and burns them

Lock up your CURV tokens and receive free airdrops from ICOs
